

Logging into Google Classroom Video Transcript

Hello there Cherry Hill families and students. This screencast is intended to help you log into a Google Student Account through CHCLC.

What you are going to need for this is your Student ID Number and your password which would have been given to you by your classroom teacher or your building administrator.

The first thing you want to do is open a tab in an Internet browser and go to Google.com. In the upper right hand corner there should be a button to sign in. If you already use Google you may already be signed in. You can click on your image and use another account to sign in.

At the Google Account Sign In window, use your Student ID Number. It is a seven digit number and then type @chclc.org after your number. Next, enter your student password and click password. This will log you into your student account. You will see that the upper right corner of the screen has changed to the student icon. In order to access Google Classroom, click on the grid icon in the upper right hand corner.

This will take you to your child's classroom. Any class that they have joined through their teachers will show here. Sometimes you will see a different teacher's class or sometimes the same teacher if they have added multiple classrooms for different subject areas. This where students can go to find assignments or any stream of information shared by the teacher.

I hope this was helpful to get you logged in. Our next screencast will be on submitting assignments in Google Classroom.
